

EnableWealth

We understand your business
before writing a single line of code.

AI & Technology Consulting for Businesses

THE PROBLEM

Great teams. Broken systems.

Manual Repetition

The same reports, follow-ups, and updates, redone by hand each week. Hours go into execution, not improvement.

No Single System

Work lives across Excel, email, chat, and CRMs. No one place shows how the business actually runs.

People as the System

Context, relationships, and know-how live in individual heads. When people move on, much of it leaves with them.

THE FOUNDERS

Built by operators, not consultants.

Chaitanya Pandit

Ran client relations at a regulated financial services firm end to end — analyst to AVP. Understands the problems from the inside.

Sanika Pandit

Built and shipped AI systems at global enterprises. Led SaaS products from zero to production across product, engineering, and adoption.

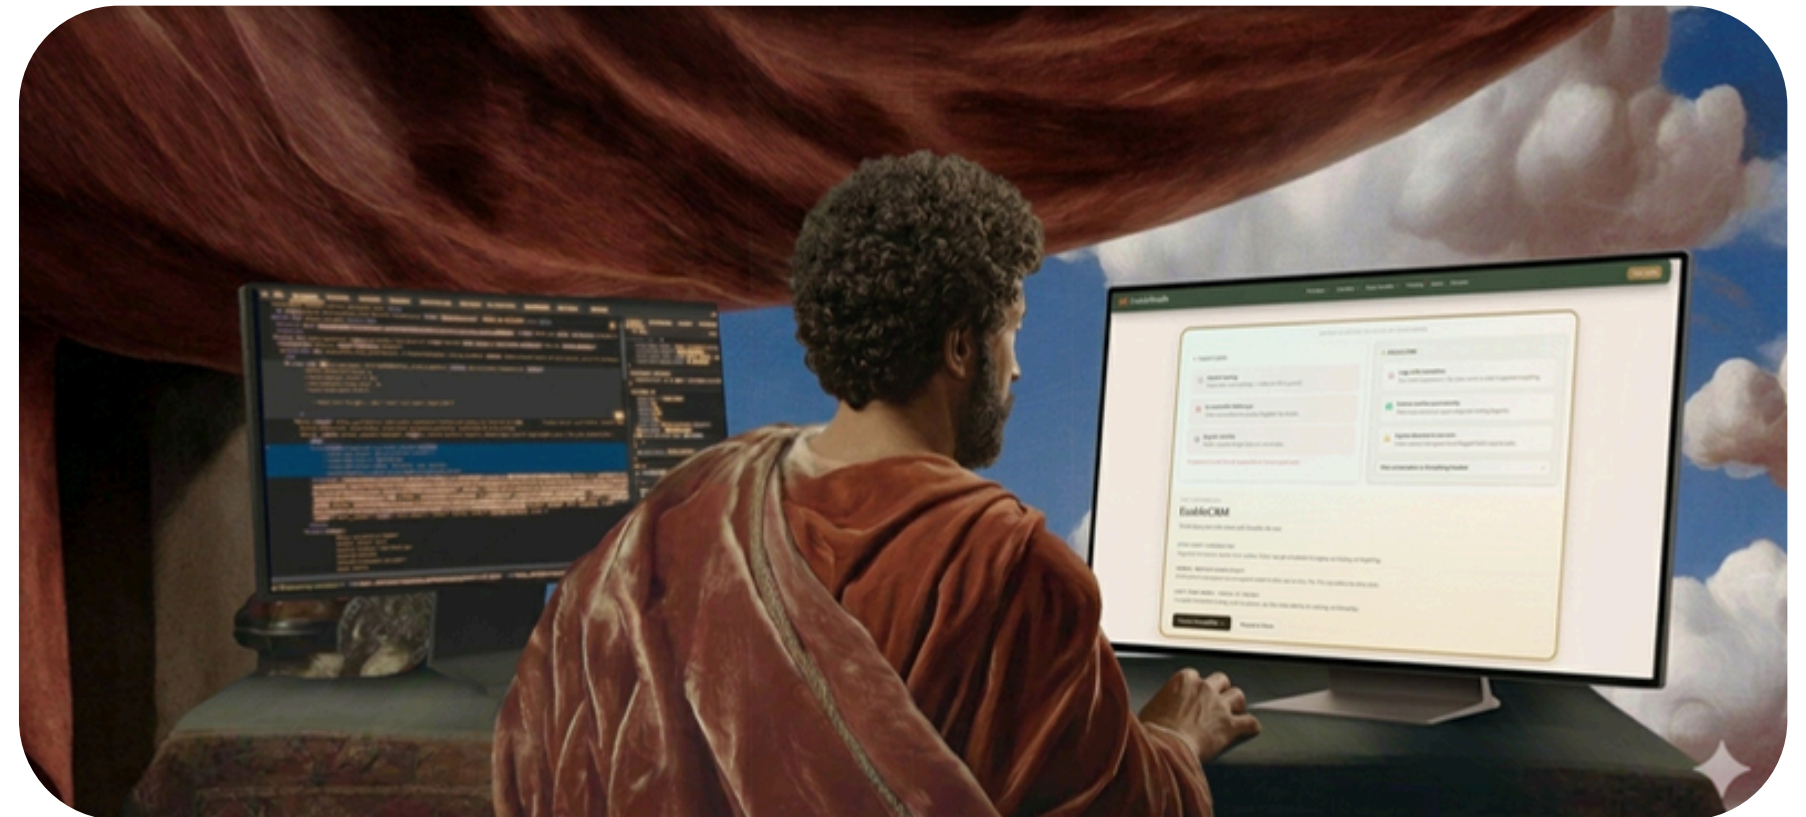

The same people who understand your business design the system, write the code, and stay until it runs.

THE SOLUTION

The layer between your business and your technology.

Step 1

Understand your existing systems

Most companies already have internal tools and processes. We don't rip them out.

Step 2

We map the intelligence layer

We design an AI layer that reads, reasons and acts across your existing processes.

Step 3

Custom agents do the work

Purpose-built agents handle the "repetitive layer" - so your people can focus on higher-order work.

Step 4

Deployment to Measurable Results

We don't hand you a blueprint. We prototype on your infrastructure, deploy it, and stay until it runs with measurable results.

ENGAGEMENT MODEL

Start where you are.

Start with Clarity (1-2 weeks)

AI Audit: For firms exploring where AI fits. We map your workflows and hand back a prioritized opportunity list. Free of Cost.

Start with a Pilot (4-6 weeks)

Proof before scale: For firms with one clear use case in mind. We build it end-to-end on your infrastructure and prove value before you commit further.

Start with a Build (8-10 weeks)

Full intelligence layer: For firms that already know what they need. We design and ship custom agents integrated with your existing systems.

Start with a Product (< 1 Week)

Mira, deployed: For firms that want results immediately. Our pre-built agentic CRM, configured to your workflow. Days to deploy.

Big firms get paid for time. We get paid for outcomes.

OUR FLAGSHIP PRODUCT

Meet Mira.

Mira is our response to Billion Dollar CRM Providers.
We've tried them all.

0

Minutes of Data Entry.

30

Seconds of a Voice Note and Mira will log everything for you like an assistant.

- Meeting Minutes
- Task Management
- Calendar & Reminders
- An AI Personal Secretary

... and More, without a single click.

OUR SERVICES

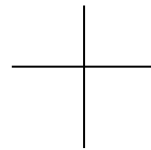

What we offer.

1

Consulting

We learn what the business needs. Build vs. buy analysis. Map existing workflows before touching code.

2

Implementation

AI layer on existing systems, custom builds, or premade solution selection and integration.

3

Pre-built Products

Ready solutions for pre-identified needs. Mira (Agentic CRM) is the first — your AI-powered secretary for client management.

4

Corporate Training

Educate teams on practical AI adoption. Not theory - hands-on implementation and sustained usage.

Where does AI Fit in for Your Firm?

Not knowing where AI fits is better than forcing it in. Our free AI-Audit walks through your existing workflows and shows you where AI genuinely helps, and where it doesn't.

DATA SECURITY

Your Data Stays Yours.

Never a Training Set

Your data is never used to train AI models, ours or anyone else's. Your relationships and competitive edge stay yours.

Built-in Compliance

Every engagement is scoped against the rules that apply to you: DPDP, SEBI, AMFI, or sector-specific guidance. The system carries your compliance obligations, so you don't have to bolt them on later.

Your Accounts,
Your Control.

Every project is built under your accounts and handed over in full. You own the infrastructure, the code, and the data. We don't retain access once the handover is done.

Cybersecurity Score (as per Internet.nl)

98%

enablewealth.ai

63%

**Average of Nifty 50 Company
Official Websites**

Internet.nl is a Dutch Govt. initiative that measures a website or email service's security (0–100%) based on modern standards like IPv6, DNSSEC, HTTPS, and DMARC, ensuring they are modern and secure.

GET IN TOUCH

Talk to our founders.

70% of global CEOs say AI is a top investment priority for 2026.

70% of Corporate AI Initiatives fail to meet expected outcomes.

The gap between intent and execution is where we operate.
